RIC (RSV A/B, Influenza A/B, SARS-CoV-2 panel by RT-PCR)

#### **MDL Test Code**

pRIC

### **Ask at Order Questions**

None

### **Specimen Source**

Nasopharyngeal

OR

Oropharyngeal

# **Specimen Requirements**

#### Container/Tube

Viral Transport Media (M4 or M5) with flocked Nasopharyngeal swab

OR

Oropharyngeal swab

## **Specimen Volume (minimum)**

N/A (swab specimen)

### **Sample Stability Time**

- 72 hours at 20 22°C
- 7 days at 2 8°C

## **Transport/Storage Conditions**

- Refer to the Nasopharyngeal Swab Collection
- Refer to the Oropharyngeal Swab Collection

#### Cautions

- This test has not been FDA-cleared or approved. It is a lab-developed test, validated by MDL.
- Undetected (negative) results do not preclude infection and should not be used as the sole basis for treatment. Results should be correlated with the patient's history and clinical presentation.
- This test is specific for RSV A/B, Influenza A/B, and SARS-CoV-2. Positive results do not exclude the possibility of concurrent infection with other respiratory viruses.
- This test detects Influenza A/B viral RNA but does not distinguish among the different viral subtypes.
